

Appl. No. 10/627,427
Amend Dated: June 24, 2005
Reply to Office Action of March 25, 2005
Docket No. 6273US

SPECIFICATION AMENDMENTS

Kindly replace paragraph [0034] on page 7 with the following:

[0034] FIGURE 1 depicts the precipitation of radiolabeled lecithin by alpha cyclodextrin beta cyclodextrin and beta glucan;

Kindly replace paragraph [0036] on page 7 with the following:

[0036] FIGURE 3 shows the increase in viscosity of different fats following mixing with hydrated alpha cyclodextrin. Compositions of final fats were 13% water, 10% alpha cyclodextrin cyclodextrin and 77% oil.

Kindly replace paragraph [0044] on page 9 with the following:

[0044] The present invention also relates to a food product in which the cyclodextrin is prepared either chemically or enzymatically from derivatives derivatives of alpha-cyclodextrin, beta-cyclodextrin, gamma-cyclodextrin and combinations thereof. In addition, the cyclodextrin used in the present invention may be formed in or on the food product by treatment with the enzyme, such as cyclodextrin glucosyltransferase (CGTase, EC 2.4.1.19) or a mutation or modification thereof.
